ABOUT THE CONFERENCE

ArrrrCamp is up to its 9th conference already and people keep coming back for more. The 2014 edition has been an exciting one for us with quite a few changes happening. We decided to change our format from two tracks into a single track to offer a more immersive experience. Because the previous venue wouldn't be able to accommodate such a format we had to find another venue (and catering) as well.

Looking back at the feedback and various tweets we received we think it was our best event yet. The venue was cozy and allowed us to work with professionals for lightning and sound, the food was top notch, and the big lounge and long breaks offered people plenty of time to socialize and get to know new people and discuss the talks of the day.

Talks were more technical, with more focus on the language we've all come to love. We'd like to take the amount of technical talks up another notch, albeit a small one, as some of our attendees suggested.
